I am a highly motivated and ambitious software engineering student with a passion for coding and a desire to make a difference in the world. I possess a strong technical background and am constantly seeking opportunities to expand my skill set. With experience in software development, database management, and project management, I am a valuable asset to any team. I am dedicated to providing high-quality work, am a quick learner, and have a strong work ethic. My adaptability and willingness to take on challenges make me an excellent candidate for any software engineering role.

WORK EXPERIENCE

Web Developer Instructor
(January 01, 2023 - Present)

Adeyemi Aderinto

As a web development instructor, I have extensive experience teaching students how to build dynamic and interactive websites. I specialize in frontend development, which involves creating visually appealing user interfaces using HTML, CSS, and JavaScript. I also have a solid understanding of Node.js, which allows Me to teach students how to build server-side applications using JavaScript.

In My teaching, I use a combination of lectures, hands-on coding exercises, and projects to help students build their skills and confidence in web development. I emphasize the importance of learning the fundamentals of web development, such as HTML and CSS, before moving on to more advanced topics like JavaScript and Node.js. I also stress the importance of writing clean, organized code and testing thoroughly to ensure that websites and applications are stable and functional.

Overall, My experience and expertise in frontend development and Node.js make Me a highly qualified and effective web development instructor, and My dedication to helping students succeed is evident in the positive feedback I have received from your students.

HOBBIES

Coding, Reading

Coding and reading are two activities that I am very passionate about. As a software engineering student, coding has become an integral part of my life. I enjoy the process of problem-solving and finding creative solutions to coding challenges. It is a rewarding feeling to see my code come to life and have a positive impact on the end-users. Overall, coding and reading are two activities that I am passionate about and actively pursue. They help me to grow both professionally and personally.
